

Om Raskar

+91-8275154698 | om020901raskar@gmail.com | Navi Mumbai, Maharashtra

Summary

Data Analyst and ML Engineer with 1 year 5 months of experience at Tata Consultancy Services, analysing production banking datasets for SBI and building deployed AI applications. Hands-on with Generative AI — built and deployed a RAG Document Intelligence system supporting PDF, DOCX, and TXT ingestion using LangChain, ChromaDB, and Google Gemini. Skilled in Python, SQL, EDA, time-series forecasting, and end-to-end ML pipeline development with live Streamlit applications.

Experience

Tata Consultancy Services (TCS) | Navi Mumbai, Maharashtra

Assistant Systems Engineer | 04/2025 - Present

- **Exploratory Data Analysis on Banking Datasets:** Applied EDA techniques on large-scale SBI production transaction datasets to identify recurring failure patterns, behavioural anomalies, and operational trends — using Python (Pandas, NumPy) and statistical methods for pattern discovery in real financial data.
- **Anomaly Detection & Pattern Recognition:** Analyzed system logs and transaction-level data streams to detect anomalies and failure signatures using statistical analysis — directly applying data-driven diagnostic thinking to identify outliers in high-volume banking operations.
- **SQL-Based Data Extraction & Analysis:** Wrote SQL queries on production banking datasets to extract, filter, and analyze operational data — identifying patterns in transaction flows, service failures, and system behaviour to support data-driven decision making.
- **Python Data Pipeline Development:** Built Python utilities using file handling and MongoDB connectivity to automate operational data extraction and processing workflows — demonstrating practical scripting ability for data ingestion and transformation tasks in a production environment.
- **Data-Driven Root Cause Analysis:** Performed Root Cause Analysis on 20+ production incidents using log analysis, transaction tracing, and cross-system data correlation — applying systematic analytical methodology to diagnose failure patterns across distributed banking infrastructure.

Skills

- **Programming:** Python, SQL
- **Data Analytics:** Data Analysis, Exploratory Data Analysis (EDA), Data Preprocessing, Excel
- **Machine Learning:** Regression, Classification, Feature Engineering, Model Evaluation, Scikit-learn
- **Generative AI:** LangChain, Google Gemini, ChromaDB, **RAG**
- **Time Series Forecasting:** AR, ARIMA, SARIMA
- **Libraries :** Pandas, NumPy, Matplotlib, Seaborn, Streamlit

Education

Smt. Kashibai Navle college of Engineering | Pune, Maharashtra

B.E in Information Technology | 05/2024

Focused on core computer science subjects like Software Engineering, DBMS, TOC, ML and built projects in Machine Learning.

CGPA - 8.43/10

Technical Projects

[RAG Document Intelligence System — LangChain / Gemini / ChromaDB](#)

- Live : [RAG Document Reader · Streamlit](#)
- GitHub : [om-raskar291/RAG_Document_Reader](#)
- Tech Stack: LangChain, ChromaDB, RAG
- Designed and deployed a production-ready RAG web application supporting PDF, DOCX, and TXT document upload with natural language Q&A — accessible live via Streamlit Cloud.
- AI answers exclusively from uploaded document — not from general knowledge — ensuring factual, grounded responses suitable for document intelligence use cases.

[Time-Series Sales Forecasting Web App — ARIMA / SARIMA](#)

- Live Demo: [Retail Sales Forecaster - AR, ARIMA, SARIMA · Streamlit](#)
- GitHub: [om-raskar291/TimeSeriesAnalysis](#)
- Tech Stack: Python, Pandas, NumPy, Statsmodels, Matplotlib, ARIMA, SARIMA, Streamlit
- Developed and deployed Machine Learning solutions for time-series forecasting using ARIMA, SARIMA, and Streamlit.
- App features interactive forecast horizon slider (3–12 months), side-by-side AR/ARIMA/SARIMA model comparison, and downloadable forecast results — demonstrating end-to-end ML deployment capability.
- Evaluated model performance using **MAE** and **RMSE** metrics, identifying SARIMA as the best-performing model with the lowest forecasting error.

Additional Information

- **Shift availability:** Fully flexible — open to 24×7 rotational shifts including US/night shifts, weekends, and public holidays
- **Work mode:** Comfortable with work-from-office requirement
- **Relocation:** Willing to relocate.
